TABLE OF CONTENTS

CHAPTER 1. INTRODUCTORY MATERIAL

1.1 Statistical Treatment of Data	1-1
1.1.1 Types or errors	1-1
1.1.2 Statistical parameters	1-3
1.1.3 The normal distribution	1-5
1.1.4 The confidence interval	1-6
1.1.5 Statistical tests	1-8
1.2 Propagation of Errors in Calculations	1-9
1.2.1 Addition or subtraction	1-9
1.2.2 Multiplication or division	1-9
1.2.3 Raising to a power	1-10
1.2.4 Taking logs or antilogs (base 10)	1-10
1.3 Linear Least Squares Curve Fitting	1-13
1.3.1 The general method of least squares	1-13
1.3.2 Some general considerations	1-17
1.4 Quantitative Calculations Involving Concentration	1-17
1.4.1 Methods of expressing concentration	1-17
1.4.2 Calculations involving dilution	1-20
1.5 Quantitative Calculations Involving Titrations	1-22
1.5.1 Direct titrations	1-23
1.5.2 Back titrations	1-26
1.6 Problems	1-27

CHAPTER 2. IONIC EQUILIBRIA

2.1 Behaviour of Ionic Solutions	2-1
2.1.1 Law of mass action	2-1
2.1.2 Debye-Hückel theory	2-2
2.1.3 Other mass action considerations	2-5
2.2 Acid-Base Reactions	2-5
2.3 General Method for the Solution of Equilibrium Problems	2-8
2.3.1 Mass balance equations	2-9
2.3.2 Charge balance equations	2-9
2.3.3 Proton balance equations	2-9
2.3.4 Brute force method for solving equilibrium problems	2-10
2.4 Equilibria Involving Acids or Bases	2-11
2.4.1 Pure solvent (water)	2-11
2.4.2 Solutions of strong acids	2-11
2.4.3 Solutions of strong bases	2-13
2.4.4 Solutions of weak acids	2-14
2.4.5 Solutions of weak bases	2-18
2.5 Acid-Base-Mixtures	2-21
2.5.1 A mixture of a weak acid and its conjugate base	2-21
2.5.2 A mixture of a strong acid and a weak acid	2-25

2.5.3 A mixture of a strong base and a weak base	2-27
2.5.4 Summary	2-28
2.6 Theory of Titrations	2-28
2.6.1 Strong acid-strong base titrations	2-29
2.6.2 Weak acid-strong base titrations	2-32
2.6.3 Weak base-strong acid titrations	2-36
2.6.4 Weak acid-weak base titrations	2-37
2.7 Indicators in Acid-Base Titrations	2-38
2.8 Buffer Solutions	2-40
2.9 Polyfunctional Acids and Bases	2-44
2.10 Problems	2-47

CHAPTER 3. INTRODUCTION TO INSTRUMENTAL METHODS

3.1 Instrumental Response	3-1
3.1.1 Linear instrumental response	3-1
3.1.2 Deviations from linearity	3-2
3.2 Relating Response to Concentration	3-2
3.2.1 Absolute method	3-2
3.2.2 Calibration curves	3-4
3.2.3 Matrix effects	3-5
3.2.4 The method of standard addition	3-6
3.2.5 Internal standards	3-10
3.2.6 Preparation of solutions for calibration curves	3-12
3.3 Detection Limits	3-14
3.4 Problems	3-15

CHAPTER 4. SPECTROSCOPY

4.1 The Interaction of Light and Matter	4-1
4.1.1 The wave description of light	4-1
4.1.2 The particle description of light	4-2
4.1.3 Absorption and emission of visible and uv light	4-3
4.2 Absorption Spectroscopy in Solution	4-6
4.2.1 The Beer-Lambert law	4-6
4.2.2 Photometric instrumentation	4-7
4.2.3 Spectrophotometric measurements	4-10
4.2.4 Spectrophotometry in quantitative analysis	4-12
4.3 Molecular Emission Spectroscopy	4-22
4.3.1 Instrumentation	4-23
4.3.2 Quantitative relationships	4-25
4.3.3 Practical fluorescence	4-27
4.4 Atomic Spectroscopy	4-28
4.4.1 Atomic absorption spectroscopy	4-29
4.4.2 Atomic emission spectroscopy	4-35
4.5 Problems	4-38

CHAPTER 5. REDOX REACTIONS AND ELECTROCHEMISTRY

5.1 Introduction	5-1
5.1.1 Electrochemical cells	5-1

5.1.2 The Nernst equation.....	5-3
5.2 Calculation of Cell Voltages.....	5-5
5.2.1 Table of standard reduction potentials.....	5-5
5.2.2 Use of the table to calculate standard potentials.....	5-7
5.2.3 Reference electrodes.....	5-9
5.3 Half Cell Method of Voltage Calculation.....	5-10
5.4 Redox Titrations.....	5-12
5.4.1 Introduction.....	5-12
5.4.2 Redox titration curves.....	5-15
5.4.3 Redox indicators.....	5-19
5.4.4 Practical considerations.....	5-21
5.5 Potentiometry.....	5-22
5.5.1 Redox electrodes.....	5-22
5.5.2 Membrane electrodes.....	5-27
5.6 Problems.....	5-38

CHAPTER 6. CHROMATOGRAPHY

6.1 Introduction.....	6-1
6.2 Theory of Chromatography.....	6-4
6.2.1 Band velocity.....	6-4
6.2.2 Band shape.....	6-8
6.2.3 Chromatographic bandwidth - plate theory.....	6-9
6.2.4 Rate theory.....	6-13
6.2.5 Resolution.....	6-16
6.2.6 Peak shape.....	6-19
6.3 Types of Chromatography.....	6-21
6.3.1 Gas chromatography.....	6-21
6.3.2 Liquid chromatography.....	6-24
6.3.3 Other types of chromatography.....	6-27
6.4 Uses of Chromatography.....	6-31
6.4.1 Separations.....	6-31
6.4.2 Qualitative analysis.....	6-32
6.4.3 Quantitative analysis.....	6-33
6.5 Problems.....	6-36

APPENDIX A. SUPPLEMENTAL MATERIAL

A.1 The Quadratic Formula.....	A-1
A.2 The Correct Use of Calculators.....	A-2
A.3 Balancing Redox Reactions.....	A-2
A.3.1 Acidic solutions.....	A-2
A.3.2 Basic solutions.....	A-3
A.4 Electrochemical Calculations.....	A-4
A.4.1 Determination of the cell voltage.....	A-4
A.4.2 Determination of (K_c).....	A-5

APPENDIX B. TABLES

B.1 Atomic Masses of the Common Elements.....	A-6
B.2 Values of Student's t.....	A-7

B.3 Values of Q_{crit} , the Rejection Quotient	A-7
B.4 Values of α , the Ion Size Parameter	A-8
B.5 Dissociation Constants of Common Acids	A-8
B.6 Dissociation Constants of Common Bases	A-10
B.7 pK_a Values of Acid-Base Indicators	A-10
B.8 Standard Potentials	A-11
B.9 Standard Potentials of Redox Indicators	A-14
